

1. Write each addition or subtraction in the box below the correct answer:

$0 + 12$ $12 + 10$ $9 + 13$ $30 - 8$ $18 - 6$

12	25	22

2. Write the partner or total in the box

$18 + 0 = \square$

$17 - 10 = \square$

$\square = 11 + 3$

$4 + 10 + 5 = \square$

$9 + 9 = \square$

$18 - 7 = \square$

3. Is the total 12? Choose YES or NO

	Circle the correct answer:
$9 + 4$	YES NO
$2 + 10$	YES NO
$12 + 0$	YES NO
$11 + 1$	YES NO
$6 + 6$	YES NO

4. Complete the Math Mountain. Write an addition and a subtraction equation to go with it.

<p>_____</p> <p>_____</p>	
---------------------------	--

How are the equations related?

5. Solve. John has a hand full of leaves. He gives 3 leaves to Steve. Now he has 10 leaves. How many leaves were in John's hand at first?

_____ label

6. Solve. The boys are making greeting cards. Sean made 11 greeting cards. Peter made 2 fewer greeting cards than Sean. How many greeting cards does Peter have?

_____ label

7. Make a drawing. Write an equation. Solve the problem.

Melinda sees 5 whales and 9 dolphins. Three of the dolphins are gray. The rest are black. How many dolphins are black?

_____ label

8. Choose an even number. Write a doubles addition equation with your number. Explain how you know the total is even.

9. Match each addition or subtraction to the correct answer.

$10 + 5 + 2$	10
$18 - 5$	19
$11 + 8$	17
$18 - 8$	13

10. Write an equation. Solve the problem. There are some children on the playground. Seven more boys came to the playground. Now there are 19 children. How many children were on the playground at first?

There were

11
7
12

 children on the playground at first.

11. Write an equation. Solve the problem. There are 5 blue, 7 white and 4 orange butterflies in the garden. How many butterflies are in the garden?

There are

574
16
15

 butterflies are in the garden.

12. Draw a comparison bars. Write an equation. Solve the problem.

Helen has 8 flowers in her vase. Mary has 7 more flowers than Helen. How many flowers does Mary have?
