

1. Write each addition or subtraction in the box below the correct answer:

0 + 25 12+13 6 + 3 30 -5 14 - 5

9	25	13

2. Write the partner or total in the box

12+0 =

17 - 9 =

= 14 + 3

4 + 9 + 6 =

9 + 6 =

16 - 9 =

3. Is the total 14? Choose YES or NO

	Circle the correct answer:
9 + 9	YES NO
4 + 10	YES NO
14 + 0	YES NO
13 + 5	YES NO
8 + 6	YES NO

4. Complete the Math Mountain. Write an addition and a subtraction equation to go with it.

<p>_____</p> <p>_____</p>	
---------------------------	--

How are the equations related?

5. Solve. John has a bag full of woodchips. He gives 5 woodchips to Steve. Now he has 10 woodchips. How many woodchips were in John's bag at first?

_____ label

6. Solve. The boys are making playdough dogs . Sean made 5 playdough dogs. Peter made 4 fewer playdough dogs than Sean. How many playdough dogs does Peter have?

_____ label

7. Make a drawing. Write an equation. Solve the problem.

Melinda sees 8 seals and 11 sea lions on the beach. Three of the seals are gray. The rest are black. How many seals are black?

_____ label

8. Choose an odd number. Write a doubles addition equation with your number. Explain how you know the total is even.

9. Match each addition or subtraction to the correct answer.

$8 + 5 + 2$

9

$19 - 7$

20

$12 + 8$

15

$17 - 8$

12

10. There are some pencils in the pencil box. Nine more pencils were put in the pencil box. Now there are 14 pencils. How many pencils were in the pencil box at first?

There were

5
6
9

pencils in the pencil box at first.

11. There are 3 bananas, 8 strawberries and 5 apples on the plate. How many pieces of fruit are on the plate?

There are

57
16
15

pieces of fruit are on the plate.

12. Draw a comparison bars. Write an equation. Solve the problem.

Stefan has 7 erasers in his box. Johnny has 4 more erasers than Stefan. How many erasers does Johnny have?
